REASONS FOR ALLOWANCE

1. Claims 1-19, 25, as presented in the supplemental amendment dated 03/15/05 are allowed.

2. The following is an examiner's statement of reasons for allowance: the closest prior art of record, the English translations of JP 2000-267086 and JP 2000-275407, fail to teach the combination of a resin sheet for use in a liquid crystal display, close to a liquid crystal layer; which comprises a hard coat layer, a base layer and a(n) reflecting layer/inorganic gas barrier layer, in that order; or a hard coat layer, a color filter layer, a gas barrier layer, and a base layer, in that order; the base layer comprises an epoxy resin layer comprising 100 parts by weight of an epoxy resin and up to 200 parts by weight of a diffuser having a refractive index different from that of the epoxy resin and having an average particle diameter of from 0.2 to 100 micron, wherein the diffuser localizes so as to have a concentration distribution in the direction of the thickness of the epoxy resin layer, and wherein the localization distributes the diffuser only in a region close to the liquid crystal layer, whereby a light-diffusing function is imparted to improve visibility.

The combination of the specific order of the resin sheet layers with respect to each other in terms of the location of the epoxy layer, and the structure of the epoxy layer in which the diffuser localizes so as to have a concentration distribution in the direction of the thickness of the epoxy resin layer, wherein the localization distributes the diffuser only in a region close to the liquid crystal layer is different and unobvious over JP 2000-267086 and JP 2000-275407.

See Applicant's remarks dated 10/29/04. There is no motivation to combine the two references.
